

**Hardware requirements for
QMSOFT® Gauge management-system
Release 5.0**

(Rel.: 06.09.2010)

The new release of QMSOFT® is able to work on all Windows-32-operating systems ("Windows 2000", "Windows XP", „Windows Vista“, “Windows 7”), but however we recommend to satisfy some minimum requirements.

Requirements for a single workplace

- Processor with minimum clock rate 1,5 Ghz or better
- RAM 1 GByte or more
- minimum 8 GByte free disk space
- CD-ROM-drive for the installation
- Screen resolution 1024 x 768, HighColor (32 bit colors)

Requirements for a network workplace

- Processor with minimum clock rate 1 Ghz or better
- RAM 512 MByte or more
- minimum 2 GByte free disk space
- CD-ROM-drive for the installation
- Screen resolution 1024 x 768, HighColor (32 bit colors)

Requirements for a database server

- Processor with minimum clock rate 2 Ghz or better
- RAM 1 GByte or more
- minimum 8 GByte free disk space
- CD-ROM-drive for the installation
